

INVITATION TO CHINA

Date: July 15th 2008
From: Joe Peng / President of Gibson Fiberglass
To: Our Friends and Customers
Re: **Invitation to China (All Expenses Paid).**

Dear Friends and Customers,

With one of the major domestic glass producer now officially closed and its 160,000 tonnes capacity gone forever, it naturally caused drastic changes to "global fiberglass sourcing" and justifiably created "panic" in our industry, and may directly or indirectly affect your company's glass sourcing one way or the other. Fortunately, Gibson Fiberglass's plant, Jushi Group fired up a total of 3 Furnaces in 2008 (detailed below), which makes us the only glass producer with the luxury of more added volume, but more importantly with the mind set to help our customers thru this difficult time.

Due to this, Gibson Fiberglass and its Plant, Jushi Group would like to cordially invite you to attend our annual "Friendship Conference" to be held at our plant in China from October 17 ~ October 24 2008. This is an all expenses paid business invitation, therefore if you still have not responded to us to confirm your attendance, please do so asap as we are expecting close to 200 attendees from North America alone (600 plus globally), therefore space are limited.

In March 2008, Gibson / Jushi Fired Up Our 4th

140,000 Metric Ton Furnace

In June 2008, Gibson / Jushi Fired Up Our 5th

160,000 Metric Ton Furnace

* Another 60,000 Metric Ton Furnace was also fired up in June 2008 at our satellite Plant in Chengdu, China.

1st 60,000 Metric Ton Furnace	=	Running perfectly and operating at 110% efficiency.
2nd 100,000 Metric Ton Furnace	=	Running perfectly and operating at 105% efficiency.
3rd 120,000 Metric Ton Furnace	=	Running perfectly and operating at 105% efficiency.

I believe this trip will prove beneficial to your company, hence I cordially request for your attendance. Thank You!

Joe Peng
President Gibson Fiberglass
